

AKC2026 Collaborative

Communique May 2019

Meeting Date: Friday 3 May 2019

The Advancing Kidney Care 2026 Collaborative (the Collaborative) is a partnership established under the sponsorship of the Queensland Health Service Chief Executives Forum. The Collaborative's role is to lead implementation of the strategic directions for kidney health and care in Queensland as identified through a state-wide review and planning process. The membership of the Collaborative comprises consumers, clinicians, executives of Hospital and Health Services and the Department of Health.

- The Collaborative held its eighth meeting on 3 May 2019. Discussion at this meeting included:
 1. The pathways, resource profiles, quality statements and measures, which describe the kidney care that all Queensland patients should receive, have been collated into a single document: *A framework for delivering quality care*. This document will be provided for broad stakeholder consultation on Tuesday 21 May 2019, with feedback due by Tuesday 11th June 2019.
 2. Agreement on the allocation of \$10 million in kidney care growth funding to Hospital and Health Services which submitted bids for a share in this funding.
 3. The structure, role and priorities of the Collaborative in 2019-2020. It was agreed that
 - a. The Clinical Stream will continue, with an initial focus on developing resources for paediatric kidney patients, promoting the content and purpose of the *Framework for delivering quality care*, and undertaking a gap analysis of current kidney care services.
 - b. The Funding stream will continue to develop, test and refine the shadow funding model, and to monitor implementation of the initiatives funded from the \$10M kidney care growth funding.
 - c. The Information Stream will continue to develop a state-wide information solution for kidney care.

The next meeting of the Collaborative is on Friday 7 June 2019.

Further information on the Collaborative is available at: <https://clinicaexcellence.qld.gov.au/priority-areas/service-improvement/advancing-kidney-care-2026>.
