Meeting Date: Friday 7 December 2018

The Advancing Kidney Care 2026 Collaborative (the Collaborative) is a partnership established under the sponsorship of the Queensland Health Service Chief Executives Forum.

The Collaborative’s role is to lead implementation of the strategic directions for kidney health and care in Queensland as identified through a statewide review and planning process.

The membership of the Collaborative comprises consumers, clinicians, executives of Hospital and Health Services and the Department of Health and a representative of Queensland’s Primary Health Networks.

1. The Advancing Kidney Health 2026 Collaborative held its fourth meeting on 7 December 2018.
2. Discussions at this meeting included:
   - Noting the Advancing Kidney Care 2026 website went live on 4th December 2018. It will be a portal for service partners and consumers to access information on the activities of the Advancing Kidney Care 2026 Collaborative. As the work of the Collaborative progresses, in future stages the website will be a central location for reliable, clinically reviewed information on kidney health and resources for consumers, their families and health professionals.
   - Reviewing updates on three key workstreams:
     a. The Clinical Workstream which will document patient pathways and care profiles and identify quality standards and indicators aligned to patient outcomes;
     b. The Funding Workstream which will develop a fit-for-purpose funding solution to support an equitable approach to resourcing of services; and
     c. The Information System Workstream which will investigate a single state-wide solution to capture and report key renal process and outcome measures.

   A program of work has been established which links these three key workstreams to ensure the development of evidence-based patient care pathways and clinical standards are supported by a funding model targeted at providing the resources required to deliver this care. The development of a statewide information system will enable the monitoring of service quality and patient outcomes and support service improvement.

   - The importance of appropriate engagement with Aboriginal and Torres Strait Islander health providers and consumers to ensure the Collaborative’s outputs are culturally responsive.

The next meeting of the Collaborative is on Friday 1 February 2019. Any queries about the Collaborative and its work priorities can be emailed to AKC2026Collaborative@health.qld.gov.au.
