Meeting Date: Friday 2 November 2018

The Advancing Kidney Care 2026 Collaborative (the Collaborative) is a partnership established under the sponsorship of the Queensland Health Service Chief Executives Forum.

The Collaborative’s role is to lead implementation of the strategic directions for kidney health and care in Queensland as identified through a statewide review and planning process.

The membership of the Collaborative comprises consumers, clinicians, executives of Hospital and Health Services and the Department of Health and a representative of Queensland’s Primary Health Networks.

1. The Advancing Kidney Health 2026 Collaborative held its third meeting on 2 November 2018.
2. Discussions at this meeting included:
   - The draft Queensland Health System Plan 2026 and clinical services capability framework review methodology.
   - Initiation of a project that will explore options for the expansion of the Queensland Renal Transplant Service.
   - Updates on projects that will:
     a. forecast the prevalence of patients who will need renal replacement therapies;
     b. document patient pathways and care profiles and identify quality standards and indicators aligned to patient outcomes;
     c. develop a fit-for-purpose funding solution to support an equitable approach to resourcing of services.
   - The need to ensure linkages between the clinical, funding and information systems work streams to ensure each stream’s outputs are complimentary and fit for purpose.

The next meeting of the Collaborative is on Friday 7 December 2018. Any queries about the Collaborative and its work priorities can be emailed to AKC2026Collaborative@health.qld.gov.au.
