# best case, worst case

The purpose of this tool is to help patients and carers understand what might happen over time depending on treatment and care options they choose. It should be completed by healthcare teams in conversation with patients and carers, supporting them to make difficult decisions.

Your name: *Patient*

Completed by: *Clinician*

## option 1

worst case scenario:

likely scenario

*place a mark on the line above to indicate the most likely scenario*

best case scenario:

## option 2

worst case scenario:

likely scenario

*place a mark on the line above to indicate the most likely scenario*

best case scenario:

## option 3

worst case scenario:

likely scenario

*place a mark on the line above to indicate the most likely scenario*

best case scenario:

This tool can be completed on its own or with the Care Companion decision aid, found here: **www.health.qld.gov.au/carecompanion**
