

# best case, worst case

This tool was designed to help patients and carers understand what might happen over time depending on the treatment and care options they choose. It should be completed by healthcare teams in conversation with patients and carers, supporting them to make difficult decisions in the context of serious illness.

Your name:

Patient

Completed by:

Clinician

## option 1

■ 

worst case scenario: **likely scenario** best case scenario:

*place a mark on the line above to indicate the most likely scenario*

## option 2

■ 

worst case scenario: **likely scenario** best case scenario:

*place a mark on the line above to indicate the most likely scenario*

## option 3

■ 

worst case scenario: **likely scenario** best case scenario:

*place a mark on the line above to indicate the most likely scenario*
